Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hiraoka et al (5,574,107). Hiraoka discloses a golf ball comprising one or more layers comprising a precrosslinked butadiene powder. Once the rubber powder is added the composition it is crosslinked again. The method of crosslinking does not appear to affect the final product. With respect to claim 19, since the material make-up of Hiraoka is identical to the materials claimed by applicant the properties are inherent.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiraoka et al (5,574,107) in view of Maruko et al (6,465,573). Regarding claims 1-5, Hiraoka discloses a golf ball comprising one or more layers comprising a base rubber

and a precrosslinked butadiene powder. Once the rubber powder is added the composition it is crosslinked again. The method of crosslinking does not appear to affect the final product. Hiroaka further discloses the golf ball comprises up to 45 parts by weight of the rubber powder based on 100 parts of the base rubber. Applicant claims from 60 to 200 parts for the precrosslinked material. Maruko teaches a golf ball comprising up to 75% of a precrosslinked rubber powder (col. 3). Regarding claims 6, the rubber powder includes a vulcanizing agent. Regarding claim 7, the anti-reversion agent is not definitely claimed as part of the invention, see claim 6. Regarding claims 8-12, since the material make-up of Hiraoka in view of Maruko is similar to the materials claimed by applicant the properties are considered obvious. One of ordinary skill in the art would have modified Hiraoka with Maruko for enhanced features.
